

TED-151-2PE

Multipurpose communication
card

Description

The TED-151-2PE multi-purpose communication card is compatible with conventional CCD-100 control panels and CAD-150 analogue control panels.

It provides the integrator, installer or maintainer with various connectivity options in a single communication card.

It has different output ports for the following functions:

2 x RS-485 for integrations with third parties via Modbus protocol

1 x Ethernet for connection:

- Detnov Cloud Application
- Compatible with SGD-RCD (Remote Center Detnov)
- Integrations with third parties via Modbus IP protocol

he TED-151-2PE card is ready to, in combination with the KIT-FB2-D transmitter, send messages in the Contact ID protocol to fire reception stations.

Applications

Detnov offers two-way verification and control tools through which you can perform accurate monitoring and even propose the most appropriate solution remotely.
